Overview of the Advance Filing Rules on Maritime Container Cargo Information

(NB)

(*1) Japan Customs gives an advance notice in principle within 24 hours after receiving the cargo information when the cargo is identified high-risk from the viewpoint of Japanese security e.g., terrorism as a result of risk analysis of the cargo information by the Advance Filing Rules on Maritime Container Cargo Information. Therefore, the advance notice can be received before loading of the cargo on a vessel and avoiding the loading of the cargo in case the filing was made 24 hours before loading of the cargo like other countries, although deadline as set forth in the legislation is 24 hours before departure of the vessel from a port of loading.

(*2) Filing in electronic form by utilizing NACCS is mandatory.

(*3) "NVOCC (Non Vessel Operating Common Carrier)" means an operator who does not own the asset of physical transport (vessels) but utilizes services by a shipping company for the transport of cargoes.

(*4) Strict inspection will be conducted after the inspection arrangement is made.

(*5) In case the cargo information is not filed until the deadline, penal provisions could be applied and the cargo cannot be unloaded without the permission of discharge by Customs.

“Description of Goods” of Data Elements

Japan Customs requires to input concrete and detailed information on description of goods to easily identify the contents of cargo in conducting risk assessment. Also, in case plural goods are included in a container, each description of goods is to be inputted in the column of the description of goods and the representing Harmonized System (HS) Code (6-digit) of the plural goods is to be inputted in the column of the HS Code.

In case it is difficult to identify the contents of the cargo by inputting the vague description of goods in the list given below, it is under consideration that such filing will not be accepted. For example, “Parts” is not accepted but “Motorcycle parts” is accepted.
